

## Peer Advisees' Testimonials

The CSA helped me to understand different lessons on my math course and it was really great because they taught me not just the concept but also techniques on how to solve problems that are not easily understood.

**Jann Hendrick G. Ugalino**  
BS Electronics Engineering

I have visited CSA at least once week for the last terms and it really had a big impact to me as student in Mapua , I think 40 percent of the reason why I passed this subject is because of them, they did not just help me to answer my complicated homework but they also helped in my review, whenever I encountered complicated question in the book because that is what I usually use in my review, I always seek help from them if they could check my answer and it is very helpful because in the day of the exam, you will have the confidence to answer those difficult question because you know in yourself that you study it and you know the right way to answer it and I am very thankful to them for what they have done for us student that is not in born with such intellectual and they are so kind and humble.

**Dwight Zedric Q. Capus**  
BS Geology

It was helpful but after some time I became busy and start to study on my own. What i like about the csa is that you can come to them anytime you want as long as someone inside can guide you that's all thank you for the help and God bless you too.

**Keenau S. Balingit**  
BS Computer Engineering

CSA/Peer Advising helped me to absorb more the lessons taught by my professors by restating the lessons within my level of understanding. In this way, I was able to ask questions freely if there's a certain topic that I don't clearly understand. Without CSA/Peer Advising, I couldn't pass my subjects last term.

**Jose Anthony A. Santella**  
BS Electronics Engineering

It was fun! Being with my friends and learning together. Solving complex problems and jokes while discussing to make the discussion lively.

**Jasper Jan O. Solee**  
BS Information Technology

It helped me clear all my questions. Expand all my knowledge towards our topics and learned some techniques to solve problems easier.

**Jayce A. Jocson**  
BS Electronics Engineering

CSA helped me to understand my lessons in Math that were not explained properly during class or the lessons I don't get. CSA also helped me in Physics and some peer advisers guided me in doing codes in C++, CS10 subject.

**Krizia Michelle D. Erodias**  
BS Geology

They teach me things that I find hard time to understand and they help me cope up in living a Mapuan life.

**Nyca R. Marcos**  
BS Accountancy

It helps me in way that I can ask them question regarding my studies and also ask some clarifications. I will be able to learn things that the professors might forgot to tell us.

**Juvy Nell L. Andal**
