INTRODUCTION

The United Nations Sustainable Development Goals (UNSDGs) serve as a universal framework for achieving peace, prosperity, and environmental well-being. As a leading institution for knowledge, innovation, and social progress, Mapua University remains steadfast in its commitment to advancing these Global Goals.

This 2024 Report showcases our continuous efforts to embed sustainability across education, research, community engagement, and campus operations. Aligned with the 2030 Agenda, we have united our academic community—students, faculty, staff, and partners—to make meaningful contributions to global development priorities.

The report outlines our shared achievements, challenges, and innovations in pursuing the 17 interconnected goals. From eliminating poverty and promoting gender equality to strengthening climate resilience and building sustainable communities, our initiatives reflect a collective pledge to ensure no one is left behind.

Through strategic collaborations, inclusive engagement, and evidence-based practices, we have reached significant milestones. Our interdisciplinary research, service-learning programs, and joint projects enable us to tackle complex societal issues with impactful, data-driven solutions. As we navigate an increasingly dynamic global environment, our commitment remains unwavering: to create a more just, sustainable, and peaceful world for all.
